

# The sensational new **Musto Skiff**. A world class singlehander from **Ovington Boats**.

KCS pictures

Downwind, the **Musto Performance Skiff** delivers the awesome pace only found before in two or three handed machines like the 49er and 18ft Skiff.

Sheet loads are amazingly light and all the evaluating sailors at the ISAF Trials found the boat positive and rewarding to sail - their smiles as they came off the water providing the evidence.

It's here. The first really *international* singlehander to provide the sort of world class challenge and performance of the 49er and 18ft Skiffs.

Designed by Joachim Harpprecht and race developed by Devoti, Musto and Ovington, the new Musto Performance Skiff is set to ignite the world of extreme sailing.

Upwind performance levels create new standards for a singlehander. Downwind - with the 15.5 sq m genniker - speed potential is awesome.

The one-design hull is precision-built by Ovington in carbon/glass/epoxy with a high-tech carbon rig to suit a wide range of helm techniques, styles and sizes.

Other builders will be licenced around the world to underwrite the boat's international future.

At the recent ISAF trials in Quiberon, France, to evaluate the latest world thinking on single-handers, the Musto Performance Skiff won every race.

What you might call a flying start.

## MUSTO PERFORMANCE SKIFF

### 49er

The ultimate twin trapeze challenge - now showing off its star qualities as the fastest Olympic class.

### 29er

In only its second year, the amazing 29er produced an incredible fleet of 65 boats from 16 nations at its 1st world championship at Lake Garda, Italy.

### B14

Now being built by Ovington, the B14 retains a huge following from non-trapeze skiff enthusiasts.
